

PPAP4AERO.com ITAR Compliant Cloud Solution

Better Than Spreadsheets!

- Built on the Microsoft Azure platform with over \$1 Billion invested in security.
- Accommodates both the AIAG & VDA FMEA Handbook and AIAG 4th Edition FMEA methodologies and forms & custom forms creation with the ability to copy and modify forms to fit both internal and customer needs.
- Linkages between forms with the capability to see all process flows, PFMEA and control plans data in a single relational database, providing visibility not possible on standalone forms.
- Concurrent licensing: One license covers multiple users.
- Version control assurance: All users globally update the same file – no more questioning if you have the latest file.
- Product Family - Common/similar parts can be created and shared from a common database.
- Part PPAP history is maintained electronically: All supporting documents created – prints, engineering specs, packaging specs, etc. – can be uploaded into the project.
- Basic program management features, including task management and action items from right side of FMEA.
- Gage R&R is intuitive and provides a concise, easy to understand report – handling both variable and attribute gages

Retail

\$125/month/concurrent user
paid annually

Storage

50GB per company
Additional Storage: \$120 per 50GB
